

## **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) An ink-jet recording sheet comprising a support having thereon a porous ink receptive layer ~~containing~~ comprising a dispersion of an oil-soluble compound,

wherein the dispersion is prepared by dispersing the oil-soluble compound with at least two nonionic surface active agents differing in HLB value, and

wherein one of the at least two nonionic surface active agents has a HLB value of not more than 10, and another of the at least two nonionic surface active agents has a HLB value of more than 10.

2. (Currently Amended) The ink-jet recording sheet of claim 1, wherein the dispersion further ~~contains~~ comprises a hydrophilic polymer.

3. (Canceled)

4. (Currently Amended) The ink-jet recording sheet of claim 1, wherein the oil-soluble compound ~~contains~~ comprises a plurality of non-aromatic unsaturated carbon-carbon bonds ~~in the molecule~~.

5. (Original) The ink-jet recording sheet of claim 4, wherein the oil-soluble compound is a polymer derived from a butadiene monomer.

6. (Currently Amended) The ink-jet recording sheet of claim 1, wherein the dispersion further ~~contains~~ comprises an antiseptic agent.

7. (Currently Amended) The ink-jet recording sheet of claim 1, wherein the porous ink receptive layer further ~~contains~~ comprises a plurality of inorganic micro particles and a hydrophilic polymer.

8. (Currently Amended) The ink-jet recording sheet of claim 1, wherein the porous ink receptive layer further ~~contains~~ comprises a cationic polymer.

9. (Currently Amended) The ink-jet recording sheet of claim 1, wherein the porous ink receptive layer further ~~contains~~ comprises a water-soluble multivalent metal compound.
